SARDINIA

PRIVATE SPA

The ultimate in privacy, a new luxurious 'Private SPA', located within the Acquaforte Spa, can now be reserved for exclusive use by a family and friends. Spend the day in a private garden with 3 thalasso pools and convenient access to all of the specialist Acquaforte SPA treatments such as Forte Lab medical assessment services, the gym and other facilities.

Private Thalasso Pool Circuit

POOL 1: Sea oil at 37°-38°

The combination of magnesium salt with high temperature water has a vasodilatory effect that increases metabolic exchanges by osmosis thereby aiding the draining and detox effect.

POOL 2: Seawater whirlpool at 35-36°

A high temperature, pure sea water pool features whirlpools that stimulate microcirculation from the soles of the feet to the abdominal muscles and the back.

POOL 3: High saline density at 36-37°C

This sodium-rich pool increases the osmosis between sea water and the body, stimulating the elimination of toxins and aiding muscle relaxation. This pool is ideal for a water massage.
